

HTML → Youtube  
 CSS → LinkedIn  
 JS → Instagram

( ) → brackets  
 [ ] → square brackets  
 { } → curly braces

let, var, const

JS is a synchronous & single threaded language  
 line by line in a specific order

- Agenda
- 1) get ignore, supporting env
  - 2) JS
  - 3) 15 min

- get ignore  
 what why how  
 mechanism you can ignore some files from your project  
 Java/C# → output → ignored  
 your system build file not added to ignore  
 your secret file { id = , not matter } pass -  
 why → ignore

how  
 ↳ work!  
 ↳ introduced file → ignore  
 treated → not added to ignore  
 ↳ ignore → X  
 - ignore  
 - hidden

JavaScript  
 ↳ good bad  
 from JS

↳ 1995 web page → program  
 Netscape → navigator browser  
 other knowns → Mozilla, IE  
 1995 → 2015 → compatible to JS  
 ECMAScript → JS

JS → language  
 note, react JS  
 technologies app build  
 code  
 JS

- S → frontend backend database → JS  
 python → frontend → HTML CSS JS  
 backend → python  
 db → python
